PROFESSIONAL EXPERIENCE

Bluexkye (Working Since November 2025)

- We built an AI chatbot system using OndeWo as the conversation platform, MCP Server as middleware, and LLM for intelligent responses. OndeWo handles intent detection and dialog flow, MCP Server manages business logic and integrations, and LLM is used for open-ended or contextual conversations. This architecture allows both rule-based and AI-based interactions in a scalable and secure way.

NeoSoft (June 2025 - July 2025)

- Developed user and admin eCommerce portals using React.js, with product listing, cart, order tracking, and authentication.
- Used React Hooks, Redux Toolkit, and React Router for state management and navigation.
- Built role-based admin modules, ensured responsive UI, optimized performance, and integrated APIs with backend.

Medimaze Solutions Pvt Ltd (May 2023 - February 2025)

- Developed and maintained the Hospital Information Management System (HIMS) web application using Angular (Version 14.2.0) and PrimeNG, ensuring a responsive and user-friendly interface.
- Collaborated with clients to gather requirements, handled both front-end and back-end development, and managed the database for seamless functionality.
- Followed Agile methodologies and the SDLC process to ensure efficient, timely project delivery and continuous improvement.

Proclink Consulting Services LLP (November 2021 to April 2023)

- Developed and maintained a Banking Payment Management System web and mobile application using IONIC (v6.16.1), Angular (v12.2.0), and Java for backend development, ensuring a responsive and cross-platform user experience.
- Implemented core features such as the Credit Card Management System and E-Wallet Management System, integrating Java-based REST APIs with the Angular/Ionic front-end for smooth and secure payment operations.
- Worked on unit testing for web and mobile applications, leveraging IONIC, Angular, and Java frameworks to ensure high code quality, reliability, and performance.

AnkHub Technology Services (July 2020 to October 2021)

- Developed an Attendance & Monitoring Management System mobile application using IONIC (Version 6.16.1) and Angular (Version 11.2.2), focusing on user-friendly interfaces.
- Created an HRMS Web Application with HTML, CSS, and Bootstrap 4 for effective employee management.
- Managed and Developed web applications on WordPress.
- Contributed social media marketing through digital marketing strategies.
